Process Pumps

You know how important your equipment is to your production process. At MasoSine, we know that too.

As tough as our Certa Pumps are, we also know they need to be serviced.

If and when that moment comes, let MasoSine meet your service and repair needs through our extensive Certified MasoSine Service Network.

Each Certified Service Provider has the skilled training needed to make sure you're up and running with minimum downtime. Service comes at a fixed price inclusive of spares and labour and with a full factory warranty.

Certa - Aftercare Service Advantages

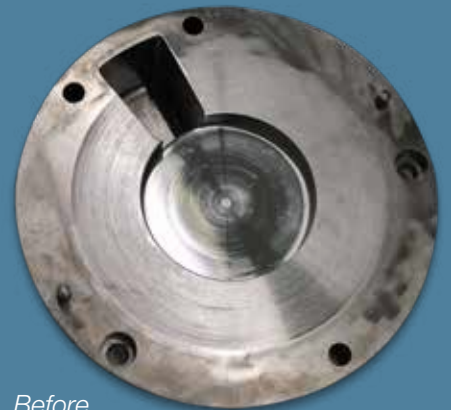

Rapid Response. As a MasoSine customer, you are our top priority when it comes to repair work.

Genuine Parts. MasoSine provides genuine Certa parts which are your best choice for maximum reliability and optimal performance. Using genuine parts will ensure the highest uptime and best possible pump performance.

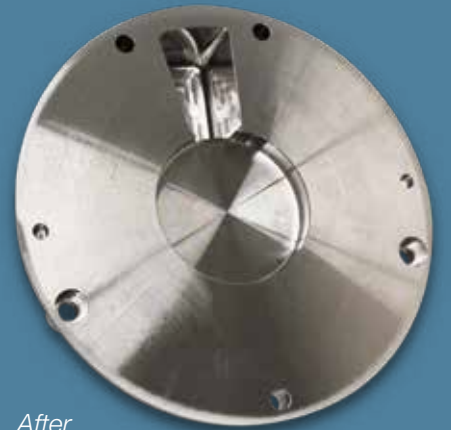

Lasts Longer, Runs Better. Your production line is as good as its components — each is dependent on the other for secure operation. A correctly maintained pump increases the production uptime and reduces the risk of unexpected downtime which improves your process efficiency. Depending on wear, the front and back housing can be serviced up to five times before replacement. Serviced pumps come with full warranty.

Please contact your local MasoSine specialist for more details:
